Relative Income Statement and Margin Analysis

BHCPR page 3 presents the key components of earnings relative to average assets, margin analysis ratios, the yields or returns on specific assets, and the cost of funds. The average balance of each category of investment securities in the Yield or Cost section is based on amortized cost, rather than fair value. For a description of the methods for calculating average balances, see page 2-3.

Definitions of specific average balances used in calculating ratios on this report page are given below.

Definitions of Average Balances

Average Assets

The cumulative sum of the quarterly average consolidated assets year-to-date divided by the number of calendar quarters to date (four-point average).

Average Earning Assets

The cumulative sum of the quarterly average earning assets year-to-date divided by the number of calendar quarters to date (four-point average). Earning assets include investment securities, federal funds sold and securities purchased under agreements to resell, loans and leases (net of unearned income), trading assets, and other earning assets as reported on schedule HC-K of the FR Y-9C.

Average Interest-Bearing Funds

The cumulative sum of the end-ofquarter balances (from the previous year-end to the latest quarter) of interest-bearing deposits, federal funds purchased and securities sold under agreements to repurchase, commercial paper, other borrowed money, subordinated notes and debentures (including equity contract and equity commitment notes) and cumulative preferred stock included in minority interest divided by the number of reporting quarters (fivepoint average).

Average Loans and Leases

The cumulative sum of the quarterly average loans and leases (net of unearned income) for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Average Investment Securities

The cumulative sum of the quarterly average consolidated investment securities for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Average Interest-Bearing Deposits

The cumulative sum of the quarterly averages for domestic and foreign interest-bearing deposits for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Average Other Borrowed Funds

The cumulative sum of the quarterly averages of all other borrowed funds for all year-to-date quarters divided by the number of calendar quarters to date (four-point average).

Other Average Balances

Other average balances, which are not defined above, are calculated based on the five-point average method. This approach consists of dividing the cumulative sum of end-of-quarter balances (of the balance sheet item) from the previous year-end to the latest quarter by the number of reporting quarters.
